Assignment 12
11/20/08

DUE: Thursday, December 4th

Questionnaire assignment:

Make a questionnaire with five or more questions about nuclear weapons, nuclear energy, Chernobyl, TMI, safety, proliferation, radioactivity, dirty bombs, radioactive waste, biological effects of radiation, nuclear terrorism etc. to find out how much fellow students (who are not taking this class) know about these subjects. The minimum number of respondents is ten. Analyze and summarize the results in a short essay. You can do this assignment together with at most 1 partner. Write a summary of your findings and draw some conclusions. Include the questions of your questionnaire.
